Technical Summary

Final-year Computer Science student with hands-on experience building full-stack applications using **Next.js, React, Node.js, and PostgreSQL**. Strong focus on database-driven systems, authentication workflows, and structured CRUD architectures for live client projects.

Technical Skills

Languages: JavaScript, Typescript, Java, C++
Frontend/Backend: React.js, Next.js, Node.js, Express.js
Databases/Tools: MongoDB, PostgreSQL, Supabase, Git, REST APIs, Vercel
Core Concepts: Data Structures & Algorithms, DBMS, Authentication, Modular Architecture

Experience

Full Stack Developer Intern Jan 2026 – Feb 2026
Coding Savvy (Remote)

- Designed and implemented a quotation management system for Shree Krishna Furniture Studio using **Supabase (PostgreSQL)**.
- Developed complete CRUD workflows with status tracking (New, Contacted, Completed).
- Structured relational schema for efficient storage and filtering; integrated frontend with Supabase client.
- Improved internal request tracking efficiency by automating manual classification processes.

Projects

AI Study Coach Live — **GitHub**
Next.js, PostgreSQL, Supabase

- Built a full-stack AI-powered study planner enabling users to plan and track daily study sessions.
- Implemented secure authentication using **Supabase Auth** with protected routes.
- Designed structured PostgreSQL schema for session, subject, and productivity data storage.
- Developed subject-wise analytics and focus timer to monitor productivity trends.
- Implemented server-side data handling and optimized query usage for efficient session retrieval.

Kharchapani – Personal Expense Tracker Live — **GitHub**
MongoDB, Express.js, React.js, Node.js

- Developed MERN-based expense tracking system with real-time balance computation.
- Designed **RESTful APIs** for transaction management and financial aggregation.
- Implemented modular backend architecture separating routes, controllers, and database models.
- Optimized MongoDB schema for efficient transaction querying and structured storage.
- Integrated frontend state management with backend APIs for seamless real-time updates.

Education

R.M.D. Sinhgad College of Engineering Expected June 2027
B.E. in Computer Science GPA: 7.4/10
SFJV Jr. College February 2023
Higher Secondary Certificate (Science) 72%

Achievements

- Finalist, Meta × Scalar AI Hackathon — selected among top teams out of 31,000+ teams nationwide.
